Hi all,

I've added some information to the [spreadsheet of socioeconomic data](#) for states/counties with Nat'l Monuments under review - demographic data, data on sources of income as well as payroll by sector. I also added a tab "Notes/Documentation" of some notes that may address some questions but feel free to ask me if you have other questions.

A note on demographics: While we did not explicitly present racial demographics in the Bears Ears paper, I found it useful to drill down into demographics because San Juan county is nearly 50/50 split white/native american and these two populations have very different economic trends. I did not put median HH income by race in the spreadsheet but if you have a county with more than one distinct racial population, you may want to drill down into median HH income by race in the Census data.
